Scorecard 2.0 | Project Charter

| HIRC Board of Directors	
Sponsor(s)	Gabriel Chan, Cardinal Health and Ruben Colon, Advent Health
Informed	HIRC Officers
Contributors	HIRC Members
Driver	HIRC Strong
Due date	Q4 2023
Status	IN PROGRESS

👥 Executive Summary

HIRC Board has requested an enhancement to the existing Scorecard 1.0

Scorecard v1.0 was intended to be an initial framework for providers to assess the resiliency of their suppliers. Use and adoption by HIRC members appears minimal. Adding sophisticated measures and expounding v1.0 will allow suppliers to differentiate and providers to select.

By identifying those currently best aligned with resiliency and adding sophisticated measures, Scorecard 2.0 Standard will be more significant in trading partner relationships.

🤔 Problem	🌱 Solution
Scorecard 1.0 is a mostly subjective tool that highlights several components of resiliency	Moving from Good to Better as part of v2.0 in the assessment criteria will add value for rating suppliers and enhance adoption

⏳ HIRC will seek the following member commitments:	
1.	Advocate for industry alignment to the HIRC standards
2.	Adopt the existing Scorecard 1.0
3.	Engage in the design of Scorecard 2.0
4.	Engage in the ideation of supplier-to-provider scorecarding

🎯 Scope

Increase sophistication of Scorecard 1.0 by expanding the criteria with meaningful measures that can be used to differentiate and select.

Through guided brainstorming, gather popular measures, focusing on the criteria that will move from good to best in evaluating, scoring and partnering with Suppliers.

To increase the value and adoption of the HIRC scorecard standard. Some members are hybridizing scorecard 1.0 with other best practice measures. We wish to capture these best practices in Scorecard 2.0.

🗝 Key Objectives

- To explore additional measures to add to v1.0
- To gain broad industry adoption of v2.0
- To explore supplier-to-provider scorecard template

✔️ Requirements

📄 Scorecard 2.0 | Additional criteria to move from Good to Best
Resiliency standards alignment
Balanced blend of subjective and objective measures
Suited for annual review
Targeted for review of supplier
Easy to deploy

📊 Measures of Success

KPI	Source
Provider Adoption	HIRC Tracker
Supplier & GPO Acceptance	

📅 Timeline

Q3 2023	Q4 2023
Design	Pilot

🚀 Deliverables

Pre-Launch (Collaborative)	Launch (HIRC)
Initiate workgroup	Validate criteria and measures
Confirm key objective scope and process	Education/Guidance
Select additional measures	Publish 2.0
Integrate membership feedback	
Process for deployment
